

**Handout: Session 4, part 6**

## A working definition of a fraction

- Identify the whole
- Make  $d$  equal parts
- Write  $\frac{1}{d}$  to show one of the equal parts
- If you have  $d$  of  $\frac{1}{d}$ , then you have the whole
- If you have  $n$  of  $\frac{1}{d}$ , then you have  $\frac{n}{d}$
- $n$  and  $d$  are whole numbers
- $d \neq 0$
