

## Handout: Video Workshop Contribution Starters

Contribution Starter	Specific instance from video or student work	Connection to focus questions
<ul style="list-style-type: none"> <li>• I noticed...</li> <li>• I wondered...</li> <li>• I was surprised by...</li> </ul>	<ul style="list-style-type: none"> <li>• <i>student's reasoning</i></li> <li>• <i>teaching move</i></li> <li>• <i>math problem</i></li> </ul>	<p>...It made me think about</p> <ul style="list-style-type: none"> <li>• <i>a particular mathematical practice or topic</i></li> <li>• <i>establishing and maintaining a learning environment</i></li> <li>• <i>students' thinking</i></li> <li>• <i>other</i></li> </ul>

### Contribution examples:

I noticed:

- The method that the first student shared in the video. It made me think about why she chose the representation that she used.
- The questions the teacher was asking as the student was sharing. It made me think about all that goes into supporting students when they share their reasoning.
- That the handout with the math problem had several questions. It made me think about other questions that might support student reasoning.

I wondered:

- About phrasing of the math problem. It made me think about how specific words can impact what students do.
- About how the use of the document camera. It made me wonder about the other media that could be used and tradeoffs involved.
- What other students in the video would have said about her explanation.

I was surprised by:

- The second student's justification. I thought that he was going to say...
- How the student in the back of the room responded to your question. I didn't think of the connection that the student made.
- The students' questions about the problem. I thought that they might have other questions like...
