

Handout: Approach 2 – Square Root of Area x 4 + 4

The Pool Border Problem

How many square tiles does it take to build a border around a square "pool"?
Find a way to know the number of tiles it will take without having to count,
for any size pool.

$4l + 4 =$

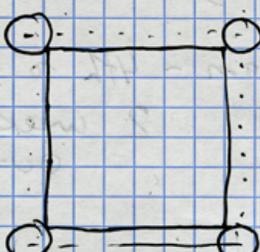

$4\sqrt{A} + 4 = T$

P Pool Size	T Border Size
4	12
9	16
16	20
25	24
36	28
49	32
64	36
81	40
100	44
121	48
225	64

Group discussion

$15 \times 4 + 4$
64

$4(\sqrt{A}) + 4 = T$

16
 $\frac{12}{28}$

$6 \times 4 + 4$

Pattern for # of tiles
is add 4 for next size

$(\sqrt{400})4 + 4 = 84$
 $(\sqrt{16})4 + 4 = 20$
 $(\sqrt{25})4 + 4 = 24$
 $\sqrt{4} \times 4 + 4$
 $2 \times 4 + 4$
 $8 + 4 = 12$
